

”Healthcare in Germany“

Cancer Prevention, Health Check Up and more for Russian Citizens by Private Physicians in the Medical Mecca Hanover

For patient-agents

Your clients who want to get a medical health check-up or need to be treated in Germany are invited to our medical “all-inclusive-service” in Hanover, capital of Lower-Saxony.

Our private high-qualified doctors-network PraxisNetzHannover.de, a team of medical consultants of almost every specialty, provides good structured early-cancer-detections, health-check-ups or specialized treatments in the private offices or clinics of these specialists.

Mitglied im  **Praxis Netz** Hannover

You as the agent for your clients are free to consult anyone of our team or to give way the coordination of all investigations to one of our General Practitioners or Doctors of Internal Medicine – or directly to my person.

Finally, your clients (*our patients*) will receive only one single invoice according to the German “fees for doctors” without exaggerated increase factors after completion of all required or necessary investigations and treatments.

Of course, our patients will receive a summary report in English or German language for themselves and their doctors at home with all reported complaints, clinical findings and our further recommendations.

Back home, your clients have the opportunity to stay in contact with us.

On request, we can help with interpreters and hotel accommodations in our nice and interesting town.

Contact us now.
